

FOR PROPERTY MANAGERS, HOAS AND COMMUNITIES

See it. Snap it. Pin it.

Cleaner grounds, without the guesswork.

PooPin turns pet-waste complaints into a cleanup workflow. Residents and visitors report a spot in seconds with a photo and GPS, no app download or account needed. Your team sees verified reports on a map, spots the repeat problem areas, sends the crew and tracks every spot until it's cleaned up.

WHAT IT DOES

Report in seconds

Snap a photo and PooPin captures the location, time and compass direction. Works in any phone browser, or from a QR sign on site.

Easy for residents to speak up.

Verified evidence

Photo metadata, device GPS and timing feed a confidence score, and duplicate reports are caught automatically.

An AI check confirms each photo shows pet waste and hides faces and license plates.

Reports you can trust.

Hotspots and patterns

See where problems repeat, when they happen and which dog descriptions keep showing up.

A live map shows every open spot across your properties.

Fix the cause, not just the pile.

Property dashboards

Draw your property's boundary and get every report inside it, with email alerts for new reports and hotspots.

Weekly summaries; private mode keeps reports off the public map.

Your grounds, at a glance.

Cleanup workflow

Send spots to your maintenance crew with exact locations and photos. Crews mark them picked up with an after photo.

Every report moves from reported to resolved.

Nothing falls through the cracks.

Heads-up for walkers

Like Waze for road hazards: as residents walk past a reported spot, PooPin asks if it's still there.

"Was this reported?" prevents duplicate reports.

The community keeps the map current.

PRIVACY BUILT IN

Location-focused, not people-focused

No names, unit numbers or phone numbers. Reporting is anonymous.

Rounded public locations

The public map shows spots to about 360 ft; exact locations go only to your staff.

No ads, no tracking

Photo metadata is stripped on the phone before upload. No data is sold.

BUILT FOR

Apartment communities

Dog-run and walkway complaints, solved with data.

HOAs

Shared areas cleaner, fewer neighbor disputes.

Property managers

One dashboard across every property you run.

Parks and campuses

Protect grass, kids and storm drains.
